SERVING YOUR COOPERATIVE

Cooperative Members who are interested in serving on the Nominating Committee or the Credentials Committee are encouraged to contact Marcy Guillen, Office Manager at (915) 964-2135 to submit your name for consideration. The Board of Directors will be selecting cooperative members to serve on both committees at their November meeting.

The Nominating Committee meets annually each December to select cooperative members interested in serving on the Board of Directors. Nominated members will be placed on the ballot for election at next year’s Annual Meeting which is set for Saturday, March 24, 2018. The Credentials committee meets annually on the day of the Annual Meeting to certify and count ballots and determine the outcome of the election.

Cooperative members who are interested in serving on the Board of Directors are also encouraged to contact Mrs. Guillen. The Board of Directors meet monthly at the Cooperative’s Business Office in Dell City and if necessary at other times throughout the year. Two positions, for District #4 and District #5, will be on the ballot for election at the 62nd Annual Meeting. Currently Tony Armijo represents District #4 and George Rauch represents District #5.

Cooperatives are part of the self-help tradition of America. Cooperatives are businesses organized by people to provide needed goods and services.

Please Remember To Vote: November 7th Election Day!

ONE MINUTE A DAY MAY LEAD TO STRONGER BONES

Keeping your bones in good shape is vital to your health as you grow older, especially for women. Research reported on the Medical News Today website suggests that women may be able to keep their bones strong by running just one minute a day. Examining data from more than 2,500 women, researchers found that women who participated in high-intensity, weight-bearing physical activity like running 60-120 seconds a day had 4 percent better bone health than women who took part in less than a minute of physical activity. Women who performed more than two minutes of exercise had 6 percent better bone health. The researchers cautioned, though, that they can't be sure whether high-intensity exercise leads to better bone health, or whether people with better bone health tend to exercise more.
